

Acry Cheng – CV

香港 · Self-Taught Builder · Finance-Driven Learner

Email: mickeycry0506@gmail.com

GitHub: <https://github.com/Cryjai>

Profile

I am a self-taught student and builder from Hong Kong with strong interests in finance, product design, behavioral systems, and education.

I build apps, study markets, and turn what I learn into products and teaching.

My edge is not following a standard path, but compressing learning into output.

- Self-directed learning across psychology, fintech, markets, and coding
 - Real product output: web apps, mobile apps, and public GitHub projects
 - Teaching as a learning system through YouTube content
 - Strong focus on commercial viability, not just academic theory
-

Key Achievements

- 2024 CUHK Mathematics & Information Competition – selected as 1 of only 10 students from school to participate (2024)
 - Yale University – Introduction to Psychology (Coursera), completed with 100% (2025)
 - University of Pennsylvania – FinTech courses (Foundations, Regulation, Payments), completed with top scores (2025)
 - Currently studying Yale “Financial Markets” to deepen understanding of market structure, risk, and financial systems (2026)
 - YouTube teaching channel – free public lessons on Mathematics, M2, Chinese and more (2026)
 - Built and shipped multiple public web apps across productivity, education, and finance (2026)
 - Created 50+ repositories and experimental builds on GitHub (2026)
 - School M2 Mock Exam – 1st in year (2025)
 - DSE Mathematics – Level 5*, ranked 1st in school (2025)
 - Hong Kong School Physical Fitness Gold Award – strong academic and physical performance (2025)
-

Tech Stack & Skills

Programming Languages

- JavaScript
- Python
- HTML / CSS

Frameworks & Tools

- React
- Node.js
- Git / GitHub

Finance & Quantitative

- Stock / market analysis
 - Quantitative methods
 - Data analysis
-

Selected Projects

Acry Portfolio Website

Personal branding website to showcase projects, CV, skills, philosophy and future monetisation directions.

Tech: HTML, CSS, JavaScript, GitHub Pages

Highlights: Portfolio UI, responsive design, personal branding, live deployed site

Routine Monsters (Android App)

Android app that gamifies habit building into a “fight monsters and level up” system to make self-discipline feel like a game instead of punishment.

Tech: Android, mobile UI, app logic

Highlights: Habit tracking, gamification, product thinking

Destiny

Personality / destiny analysis style product that turns abstract interpretations into interactive, repeatable and visual tools.

Tech: JavaScript, UI design, logic flow

Highlights: Interactive tool, data / pattern interpretation, niche product design

Acry Finance Hub

Personal finance hub integrating budgeting, investment tracking, financial analysis and data visualisation.

Tech: HTML, CSS, Chart.js

Highlights: Budget management, portfolio overview, visual analytics, finance-focused UX

Acry Infinite DSE Quiz

DSE question bank system featuring AI-generated questions, intelligent marking and progress tracking.

Tech: JavaScript, AI integration

Highlights: AI question generation, smart grading, learning product, multi-subject support

More Experiments on GitHub

Ongoing JavaScript practice, Python tools, education products and finance-related side projects.

Tech: JavaScript, Python, GitHub

Highlights: Rapid prototyping, public build log, continuous experimentation

Education

2026 – Present

Android App Developer (self-directed learning)

- Developing apps for productivity, education and entertainment
- Focusing on product thinking and shipping real, usable tools

2025 – 2026

DSE Retaker (Self-Study)

- Full-time independent preparation for HKDSE
- Chose to retake instead of entering university immediately
- Rejected purely traditional mass-production style education, built own learning path

2019 – 2025

Tak Oi Secondary School

- Demonstrated strong mathematical talent during school
 - Started shifting towards self-directed learning and independent study
-

Experience

2024 – Present

Full-Stack Developer & CEO – Acry Tech (Personal Brand)

- Built multiple web applications covering finance analysis, learning management and productivity tools
- Managed end-to-end process from idea, design and development to deployment

2023 – Present

Self-Taught Programmer – Independent Learning

- Used free online resources to self-study programming, computer science and related fields
- Goal: reach a level that can outperform many traditional CS graduates in real-world output

Content Creation (Ongoing)

<https://www.youtube.com/@AcryChak/videos>

YouTube Teaching Channel – Independent

- Created free teaching videos for Mathematics, M2, Chinese and more
 - Used teaching as a way to deepen own understanding and help other students
-
